DSP India Equity Strategy

People | Process | Performance

This is a marketing communication. Please refer to the Prospectus and KIID for more information on general terms, risks, and fees. Investors should only invest in the Fund once they have reviewed the Prospectus and KIID before making any final investment decisions.

TIM.DSPUK.PR009.2026

Strictly For Use By Intended Recipients Only

The DSP Group: A Long and Storied History

Time-tested legacy in the Indian financial markets

165+ Years

Among the oldest financial firms in India

Founding Members of BSE

From the DSP family

Market Pioneers

Helped professionalize capital markets

29 Years

In asset management

30+ Years

In global partnerships

Focused Core Business

Only investment management

Deep Corporate Access

Introduced many of the top 300 Indian companies to capital markets

Long-Term Mindset

From being family-owned yet professionally managed

Seasoned Talent

Our 28-member team has invested through multiple market cycles

Solid Investment Fundamentals

From decades of experience and joint ventures with global firms

Equity AUM
USD \$23.5 Bn

Our Principles Drive Investor Focus and Alignment

01.

Maintain Long-Term Mindset

Generating long-term alpha (~200-700 bps) across strategies since inception.

02.

Focus on Investors First

Close funds when margin of safety is low / valuations are sky high.

03.

Hold Investment Frameworks Sacred

Operate with transparency and clarity to build trust and alignment with investors.

04.

Pay Attention to Sustainability

Gradual introduction of ESG frameworks into our portfolios; signatory to UNPRI.

05.

Minimize Risk

Employ the 10th man rule ('Sceptical Analyst') to minimize accidents due to accounting frauds or poor governance.

06.

Inculcate Owner's Mindset

Offer a long-term employee stock ownership plan

07.

Keep Skin in the Game

The DSP Group family invests their wealth in DSP Funds, as do DSP employees.

Our Edge

#	Potential Alpha Sources	Taking Advantage of	Our Primary Alpha Source?	Comments
1	Research	In-house strong research team	Yes	Focus on Moats, Incremental RoE's and Growth
2	Behaviour	Avoiding short term noise	Yes	- Gain from mis-pricing due to short-term noise (e.g. Polycab, Coforge) - Long-term investment horizon
3	News flow	Information arbitrage	No	Avoid noise
4	Technicals	Liquidity squeezes, sudden fund flows etc.	No	We do not prioritize technical analysis

The Opportunity

Where to invest in India's equity investment landscape

Focus of >90% of India-centric UCITS funds

Familiarity Bias?

Large Caps

~82 stocks
~ 64% FFMC
(>~US\$ 5bn)

~3258bn TMC | ~1356bn FFMC

MSCI India Index

Mid Caps

~83 stocks
~17% FFMC
(~US\$ 1bn – 5bn)

Small Caps

~461 stocks
~19% FFMC
(<~US \$1Bn)

~867bn TMC | ~348bn FFMC

MSCI India Small Cap Index

Untapped Opportunity

There is a significant investable market beyond the large and mid caps

How Mid caps performed? Active management generated superior return/risk

Our actively managed small and midcap oriented strategy has generated superior return/risk

Low ownership, sparse research, and high diversification contribute to alpha

1 Large & mid cap alpha warning: Small caps present alpha opportunity

~ 4.5%

Alpha CAGR since inception of the DSP Strategy over the MSCI India Index

2 Small cap stocks tend to be under-owned and under-researched

3 MSCI India Small Cap is more diversified, offering variety in stock picks

Diversification	MSCI India Index	MSCI India Small Cap Index
GICS Industry	45	63
No. of stocks	160	518
Top 10 concentration	38.4%	11.4%

High ROE and earnings growth companies generate wealth

- We analysed data from Indian large cap, mid cap and small cap companies over the past decade to understand their return potential
- In the Indian markets, a combination of healthy ROE and high earnings growth has historically resulted in superior price performance

Market peak before GFC					
Profit Pool Increase (% CAGR)	Average ROE	Average Price Appreciation	No. of Stocks Moved	Market Cap Classification (as of Jan 2008)	Market Cap Classification (as of 30 June 2026)
11.4%	16.7%	11.2%	48	Large & Mid Cap	Large & Mid Cap
7.6%	8.7%	0.5%	42	Large & Mid Cap	Small Cap
18.8%	18.2%	21.7%	25	Small Cap	Large & Mid Cap
13.5%	20.7%	15.6%	136*	Small Cap	Small Cap
12.3%	7.4%	9.8%	118	Small Cap	Small Cap
Elimination is key					

A sizeable pool of high-quality companies have the potential to provide superior returns

India — A Land of Multi-baggers

1/4th of the stocks within India’s Top 500 Universe have delivered over 900% returns over the last 10 years

Investment Philosophy

Portfolio Manager: Vinit Sambre

Vinit Sambre,
who has been at DSP since 2005,
heads the equity team

“Patience, embracing volatility
and owning capital efficient
businesses run by capable
managers for long periods of time
is my source of wealth creation.”

Experience

- 26 years of investment experience across 4 major market cycles
- In-depth knowledge of Indian equities, specifically in the small and mid-cap space
- Successfully delivered on a variety of mandates, including concentrated thematic portfolios

Style

- Buy & hold
- Identify and back high-quality managements / promoters through cycles

Recognition

- Recipient of several awards during his tenure

How we generate investment ideas

Many sources of ideas:

- Interactions with 550+ companies a year (including companies outside our coverage)
 - 15+ conferences a year
 - Industry experts, supply chain checks
 - Sell-side interactions
 - Journals, magazines, and other sources
- Daily morning calls
 - All-day team meetings every Wednesday
 - Internal screens

Investment philosophy is focused on sustainable long-term wealth creation

01. Our fundamental bottom-up analysis prefers companies exhibiting:
 - Scalability of business
 - Identifiable and sustainable moats
 - Consistent high Return on Equity over the cost of capital
 - Incremental capital allocation in equivalent or better ROE businesses
 - Prefer companies with good governance
02. We have a long-term investment horizon; however, we optimise weights considering business and valuation cycles.
03. We would sell our positions where valuations rise to unjustifiable levels, or where the investment thesis breaks down.

We are wary of:

- Capital misallocation
- Poor governance
- Business Disruption like:
 - Regulatory changes
 - Technological disruptions

DSP Edge

Temperament

**Research
Capability**

**Eliminating
Behavioural Biases**

Investment Framework – Pillars of Stock Selection

Quantitative framework to build long term conviction and avoid big errors

- 3 Yr. Avg. ROE >16%
- 5 Yr. Avg. EBITDA Growth >13%
- 5 Yr. Avg. PAT Growth >13%
- Margin Increase: EBITDA Growth > Sales Growth
- Earnings per Share (EPS) Growth Variation <100%
- Net Debt/EBITDA <3x
- Positive Free Cash Flow Yield
- Receivables, Inventory & Payable Days Variation <30 days

Quantifying metrics to evaluate the 3 pillars

Our learnings over time

01.

Deep analysis of historical business cycles over 10-15 years, not merely management's future guidance.

02.

Bottom up company research is more useful than predicting macro.

03.

Temperament – ignore noise and don't react to every piece of news.

04.

Contra-cyclical plays – use temporary disruption/down cycles to buy good companies.

05.

With significant dispersion within each sector, active stock picking is important and eliminating losers is key.

06.

Remember learnings from past mistakes

07.

It's essential to work with a long-term mindset and have investors with a long-term capital horizon (>5 years).

Patience

- Simple scalable business
- Large opportunity
- Strong cash flow, ROCE
- Avoiding noise and not processing each & every piece of information

Patience – Temporary disruption is an opportunity

- Use temporary disruption to double down
- Not easy when the stock goes through correction
- Our confidence stems from deep understanding of business cycle, fundamentals and management attributes
- Low impact cost during such periods

How we size our portfolio

Sizing is driven by conviction, upside and sense of business cycle and valuation cycle.

Our portfolio comprises:

4-5%

High conviction, low to medium business cycle, reasonable valuation, long term businesses

2-4%

High conviction, low to medium business cycle, high valuation businesses

1-2%

High conviction, medium to high business cycle, high valuation businesses (that we gradually build on during temporary distress)

Buy and hold approach → lower portfolio turnover & alignment with guidance to investors

Category median portfolio turnover ratio

48%

DSP strategy portfolio turnover ratio

26%

The stock market rewards those who patiently invest in capital efficient businesses for the long term

*Median for last 10 years

Our Buy & Hold Philosophy

- We align holding periods of investee companies with their entire business cycles.
- We size companies in our portfolio based on our assessment of how they rank on our philosophy.

Top 5 gainers (Last ~5 years)	Return Multiplier	Top 5 Gainers*	Return Multiplier	Holding Period (years)	Period Held
SRF Limited	7.21x	SRF Limited	117.64x	14.91 Years	Mar '07 to Jan '22
Atul Limited	4.30x	Eicher Motors Limited	41.58x	5.1 Years	Mar '09 to Mar '14
IPCA Laboratories	3.94x	Bajaj Finance Limited	16.89x	5.6 Years	Sep '08 to Mar '14
Coromandel International	2.71x	Bayer Cropscience	10.68x	11.5 Years	Sep '08 to Feb '20
Supreme Industries	2.37x	GRUH Finance Limited	8.40x	4.8 Years	Mar '08 to Dec '12

Representative Indian mid cap equities portfolio data.

High conviction holding — Higher concentration in the portfolio
Add to holding during market corrections

Strong business + quality management = ignore noise, hold, add opportunistically

Sell Discipline

We sell if there is significant deterioration in fundamentals, corporate governance issues, fraud or misrepresentation of facts

Profitable positions where valuations rise to unjustifiable levels

Trim / book profits

Positions where investment thesis is not unfolding as envisioned

Cut losses / Sell

Mistakes – A Source of Learning

Top 4 Losers*	Holding Period (years)	Period Held	Average Weight During Holding Period	Learnings
Pennar Engineered Building Systems	3.2	Sep '15 to Dec '18	0.7%	Capex heavy businesses require clear visibility of growth
Titagarh Wagons .	2.3	Mar '11 to Jul '13	1.2%	Capex heavy businesses require clear visibility of growth
Navkar Corp .	2.6	Mar '16 to Dec '18	0.7%	Be watchful about adverse regulatory changes and capital misallocation
Indo Count Industries	2.2	Oct '16 to Dec '18	0.8%	Fortified our core beliefs of not purely relying on management guidance

* Representative Indian mid cap equities portfolio data

Case Study 1: Bharat Forge

1

Idea generation

- a. Growing revenue from non-CV business (39% in FY08 to 59% in FY23) reducing cyclicality
- b. Capex in high gestation defense & aerospace business finally showing revenue visibility (~7% revenue share in FY23)

2

In depth company analysis

Business	Management	Valuations
- Incrementally becoming component to system player - One of the largest, efficient & innovation-led forging companies in the world - Customer base includes virtually every global automotive OEM and Tier I supplier	<u>Long-term strategic vision</u> evident in decade-long investment in defense sector. <u>Judicious capital allocation</u> into PVs, industrials (to reduce cyclicality) & aluminum & electric vehicles (emerging businesses) <u>Effective succession planning</u> in place for organizational continuity.	- Increasing diversification, reducing cyclicality, investing in emerging & high entry barrier businesses is changing company's profile. - Previous investments now started yielding results leading to better return ratios - This positive trend contributes to potential upward re-rating of valuation multiples.

Case Study 2: Alkem Laboratories

1

Idea generation

- a. Growth Levers for the pharma sector:
Lower per capita consumption, ageing population to increase, rising awareness of healthcare, increasing lifestyle related diseases & increasing insurance penetration
- b. Lower revenue mix of chronic growing at a faster pace
- c. Significant FCF generation

2

In depth company analysis

Business	Management	Valuations
- The company gets >35% of its business from top 10 brands which establishes their ability to create larger brands - Leading player in the acute care and a fast-growing player in the chronic care (overall market share increased from 3.6% to 4.1% in the past 3 years)	- Strong management with the ability to maintain business revenue across cycles - Ability to pivot itself to trade generic business (largest in India) despite getting cannibalized in its core branded business - Decent Capital allocation history (average of >15% ROCE in the last 5 years)	- Strong growth levers of industry coupled with proven track record of Alkem makes it an ideal candidate to play domestic healthcare industry - Given the industry framework, it can grow without large capital requirement resulting in very high FCF generation & superior return ratios

Case Study 3: Phoenix Mills

1

Idea generation

- a. Phoenix provides relevant real estate space for brands with much higher footfalls. Most of the malls are at prominent destination in key cities
- b. Higher real estate cost & availability of large size land parcel within the city makes it a higher entry barrier business
- c. Per capita grade A malls are significantly lower in India, which provides very high growth visibility in coming years
- d. With rising urban population, rising income levels & aspirations, demand for quality real estate for retail will remain high
- e. Strong unit economics

2

In depth company analysis

Business

- Evolved from a single retail destination in early 2000s to the pioneer of retail-led mixed-use developer in the country
- India's largest owner and operator of Grade A retail mall with 9 Malls having leasable area of ~10.94 Mn sq ft across 6 cities and 4 in pipeline with 2.3 Mn sq ft.
- It also has mixed-use assets encompassing commercial space of ~1.4 Mn sq ft and ~1.2 Mn sq ft in pipeline. It has 2 hotels & 1 more is expected in next 2 years.

Management

- Mall development is a long gestation business requiring meticulous real estate selection, timely execution, & enduring brand relationships which phoenix has evidently showcased over last 2 decades.
- Despite growing its real assets at brisk pace, it has maintained its capital structure by getting renowned partners like CPPIB, GIC at SPV level
- Very high focus on capital efficiency at unit level reflecting in its return ratios of mature malls (40%+ in the flagship mall & 22%+ in the top 4 malls)

Valuations

- Strong industry potential coupled with strong free cash flow generation provides good visibility of growth for next many years
- Better way to play discretionary spend theme across categories & at a relatively reasonable valuations

Case Study 4: Supreme Industries

1

Idea generation

- a. Per-capita PVC pipe consumption significantly lower than even world average (11kg vs 30 kg), this demand is set to increase led by high Infra spends, Nal se Jal yojna & sustained demand in housing
- b. PVC pipe industry is very consolidated with the top 5 players contributing ~40% of market share reflected in the strong pricing power
- c. Growth prospects of Pipe industry to be high due to improving completion rate of real estate projects and revival in demand for agri-pipes

2

In depth company analysis

Business	Management	Valuations
- Largest PVC pipe company in India with market share of ~12-14% & strong focus on ROCE - The company has been steadily improving capex intensity (average capex improved from ₹2.4 Bn in FY 16-18 to ₹4.2 Bn in FY 21-24) while maintaining Superior balance sheet across cycles	- Supreme industries has consistently generated healthy ROE (average ~25% in the last decade) with respectable market shares across categories (business with low ROEs have been divested in the past) - It is likely to grow at ~15% CAGR for the next 5 years led by increased capex intensity, market share gains from both organized & unorganized players & introduction of new polymer-based products	When the company was added to the portfolio it had attractive valuations (mid 20s PE), high return ratios (ROE>20%), superior balance sheet resilience across economic cycles and robust FCF generation

Strategy Characteristics, Performance and Risks

We are differentiated from the typical Indian benchmark (MSCI India)

Not our portfolio! (Large cap / blue chip focus)

Stocks	Total Market Cap in USD Billion	Weight in MSCI India Index
HDFC	130.0	7.00%

Addressing valuation

- Valuations are not cheap and looks to be pricing in FY27 as well.
- We are addressing in following ways
 - Investing in capital efficient businesses across sectors run by capable management thereby reducing big risk of capital loss.
 - Identifying businesses with longevity of growth and strong moats.
 - 1.5 year of market consolidation or 20-25% lower price points could make it attractive – **wait or invest ?**
- My view to Investors
 - Growth potential looks promising over next 5-7 years with higher probability of mid sized companies outperforming on earnings growth matrix.
 - We have put in strong process to identify long term wealth creators and avoid big risk arising due to poor governance or narrative driven businesses.
 - Invest with 3-5 years time horizon rather than 1 year time horizon.

We own businesses with superior moats and earn over ~16% ROEs

No. of Companies	Particulars	Total Weights (%)	P/E - FY27E	P/BV - FY27E	ROE-FY27E	Growth-FY27E
24	Less than 20x P/E	32%	14.5	2.3	16.2%	163.6%
11	Between 20x and 30x P/E	21%	24.2	3.8	17.3%	22.0%
28	Above 30x P/E	44%	49.2	8.5	21.4%	29.5%

- Expensive bucket breakdown
 - New age companies and platform companies like Eternal, Lenskart, PB Fintech, MCX where growth rates are high.
 - Consumer discretionary names that are in mid cycle like Page Industries, Phoenix Mills, Bharat Forge, Uno Minda.
 - Materials that are in low cycle like Supreme Industries, JK Cement, PI Industries etc.
 - Fancied sectors in high growth phase catering to power & energy sector like Polycab, Apar etc
- Least expensive buckets comprise of financials, IT sector with decent ROEs. We have not compromised on quality.
- Mid bucket is stable businesses like pharmaceuticals, Auto OEMs.

Quality is mean reverting ! Our portfolios are aligned to this shift

- For creating long term wealth both Quality and valuations are important. Just valuations in isolation may or may not work.
- Quality has suffered in the past 3-4 years where our portfolios also underperformed.
- Gradual mean reversion taking place, that augurs well for our portfolio.

DSP India Equity/Midcap Strategy has beaten average India focused UCITS returns on a 1,3,5,8,10 & Since Inception basis

Portfolio positioning

- We have increased exposure to lending financials, particularly NBFCs, where the impact of rate cuts is likely to be more visible through improving NIMs and credit momentum. The West Asia crisis and resultant rising bond yield has recently raised concerns around growth and asset quality that we are looking to rebalance towards better quality franchise.
- Large private banks have underperformed last 1 yr, and with credit growth beginning to recover, we see an opportunity to selectively add exposure.
- Within Industrials, positioning is driven by both the valuation cycle and improving capital expenditure visibility, particularly in areas such as energy transition and data centres.
- The benefits of direct and indirect tax rationalisation are being expressed through consumer discretionary particularly auto segment, where demand sensitivity to disposable income is higher. Auto exposure is ~10% of 18% exposure to consumer discretionary.
- While stock selection remains fundamentally bottom-up, we are tactically aligning exposures where macro signals provide incremental tailwinds.

ESG / RISK Framework

Responsible Investments at DSP

Key Highlights

Our Two-Pronged Responsible Investment Approach	
ESG Integration To drive robust ESG integration in our investment process via policies, protocols and procedures.	Active Ownership To drive accountability for adverse impacts on portfolio companies through continuous engagement and monitoring.

International Networks & Forums

Proud supporters of:

Signatory/Member of:

- Analysts and portfolio managers, participate in discussions on material ESG issues like climate risk, energy transitions etc.
- Lead/collaborative investors on CA100+ engagements for companies in the hard to abate sectors
- **Member of Industry leading groups:**
 - CFA Institute [Sustainable Investing Advisory Panel](#)
 - PRI in Person 2025 Signatory Advisory Committee
- **Media articles:** [SEBI BRSR review](#), [India ESG Funds](#), [ESG & Investment Thesis](#), [Climate Risk and Fiduciary Duty](#).
- **Promoting wider adoption:** [Presenting Indian perspectives at PRI in Person 2025](#), [Bridging the Gaps: Intensifying the BRSR](#), [India Sustainable Investment Leadership Summit 2024](#), [Exploring Sustainable Investment Opportunities](#), [Integrating Sustainability in Investment Decisions: What, Why and How?](#) etc.
- **Sustainable Investment product:** India sustainable growth strategy

ESG Investment Process

ESG Integration Framework:

- We have developed a proprietary risk-opportunity structure with 45 scored criteria and 60 analytical data points covering a wide range of material ESG topics.
- We collate and analyze data on stakeholders' environmental/social concerns, GHG emissions profile, long & short-term climate targets, biodiversity, water & wastewater, energy, circular economy, human rights, diversity, human capital management, data privacy, product quality, safety, supplier engagement, access and affordability, etc.
- We research governance related topics such as related party transactions, board & key management personnel (KMP) remuneration, board independence, promoters pledging, audit quality, controversies and credit rating parameters, to name a few.

ESG Investment Process

Engagement

Our engagement motivations are two-fold: to mitigate risk and generate positive impact.

The engagement process also involves the firm stewardship committee and active voting on company resolutions with help from a proxy voting firm

Our Sceptical/Forensic Analysis Framework

The Aim of Forensic Analysis

The value of avoiding an accident is almost always underappreciated until one occurs. Having a specialist in the team helps us avoid most accidents by increasing our rigor on forensic research.

We aim to identify and avoid companies with these characteristics:

- Poor earnings quality, aggressive accounting and consistent overstatement of earnings
- Manipulated/unusual cash flows that mask the real picture
- Bad capital allocation and high balance sheet (BS) risk
- Poor board, governance and promoter background/quality

We manage risks by rigorous forensic research on investee companies

Forensic Framework Checklist

Sceptical / Forensic analysis at DSP

Forensic Rating Framework

Classification system for identifying accounting quality and forensic risk levels

Forensic elimination – Outcomes?

Period	28-02-2025	28-02-2020	
	Good	Avoid	Nifty500
CAGR	25%	14%	17%
SD	20%	25%	19%
Max DD	-44%	-70%	-38%
Risk/Return	1.3	0.5	0.9

Bottom line

- Companies with poor earnings quality/ poor governance underperform in long run.
- Though, irrationality can persist in short term led by narratives, strong business cycle/ momentum, favourable macro environment, etc etc....

Investment Risk Management at DSP

Portfolio Risk Monitoring

- Independent Risk & Quantitative Analysis team (RQA)
- Regular Risk meetings to “Hold a Mirror” to portfolio risk
 - Macro stress testing
 - Sector & style exposure & returns monitoring, market trends
 - Tolerance limits for stop losses and drawdown

Key Inputs

- Stock level contribution to risk
- Predicted vs delivered volatility & beta
- Factor risk breakdown of portfolio, including NAV at risk analytics
- Tactical indicators for monitoring reversal risks

Position Level Monitoring

- Constant review of performance: large winners / losers
- Constant monitoring of investment thesis with research team

Indicative: It takes ~10 days to liquidate 60% of the DSP Strategy portfolio

Current portfolio +/-25% refers to the assets (AUM) in the strategy increased or decreased by 25%, as two alternative scenarios, to depict how liquidity of the portfolio could change under these new AUMs

Indian Public Equity Market Landscape

Indian companies are competitive as per global benchmarks

1 % of companies with ROE >15%

2 % of companies with mcap >US \$10Bn

3 No. of billion dollar companies in India (market cap)

4 % Ownership of top 75 Indian companies

Why India Outperforms Over The Long Term? It's Not Flows, GDP Growth or The Story...

- India's long-term market outperformance is often attributed to familiar narratives such as strong domestic flows or robust GDP growth.
- Adjusting for differences in the cost of capital, India stands out among global markets. It ranks second only to the USA in the number of companies that have maintained an ROE above 20% for more than a decade.
- This sustained strength in corporate profitability is the true engine of India's market outperformance underscoring the enduring fundamentals, rather than popular macro narratives, are what ultimately drive long-term equity returns.

India is well diversified across sectors

MSCI Sectors	India	China	Korea	Taiwan	Hong Kong	Singapore	Malaysia	Indonesia	Australia
Energy	8%	3%	1%	0%	0%	0%	0%	3%	4%
Materials	9%	5%	1%	2%	0%	0%	8%	6%	24%

Communication Services	5%	20%	2%	1%	1%	7%	5%	11%	2%
Utilities	4%	2%	0%	0%	10%	1%	14%	0%	2%
Real Estate	1%	2%	0%	0%	16%	6%	0%	0%	5%
Top 2 Sector Weights	43.2%	43.9%	83.2%	95.3%	66.7%	74.5%	66.2%	77.3%	65.1%

Why Now?

Is sustained 9 - 10% nominal GDP growth for a large economy even possible?

- China/South Korea grew per capita GDP at 8.0% / 8.8%, respectively, for 10 years from levels similar to India's US\$7,207 PPP adjusted 2018 per capita GDP.
- To convert to nominal GDP growth, we factor 1.5% population growth (assumed).
- So 9 to 10% nominal GDP growth is certainly possible, over a 10 year period or longer.

4 key themes which we believe will play out for India going forward

1 Penetration of Financial Services

2 Consumption story fast forwarded by Digitization

3 Infrastructure boom

4 Export Opportunities

Active managers in India have consistently outperformed passive

Greater diversification with direct India exposure (not via EM)

1 India expected to be 3rd largest economy in 2028

2 India has low representation in global indices

RANKED 5TH BY GDP (US\$, Tn)

RANKED 5TH BY MARKET CAP (US\$ Tn)

MSCI ALL COUNTRY WORLD INDEX

Country	Holding
USA	63.6%
Japan	5.0%
UK	3.0%
Canada	2.9%
France	2.1%
South Korea	2.9%

Power	NTPC Ltd	E.ON SE	10.9	9.0	8%	-4%

Are you late in investing into India? No, not in our view.

- The conflict has lasted longer than initially anticipated, keeping geopolitical uncertainty elevated.
- The 10-year yield has moved above 7%, reflecting rising concerns around inflation, crude and fiscal pressures.
- If crude sustains around US\$105/bbl, India's CAD could potentially move beyond 2.5% of GDP.
- Higher crude and inflation could weigh on consumption, margins and the broader growth outlook.
- Q4 results were largely resilient, but margin pressure may become more visible from Q1 onwards.
- FIIs have sold more than US\$23bn, adding to market pressure and currency volatility.
- Banks, insurance, consumer names, power and capital goods have held up relatively well.
- OMCs and crude-sensitive sectors have been more adversely affected by the spike in oil prices.
- It is easy to build a negative scenario, but the market has already seen meaningful time correction, price correction and currency adjustment.
- We should be prepared for uncertainty-led volatility.
- Portfolio positioning appears reasonably comfortable.

Earnings, Valuations and Flows

India Valuations:

Relative – Price to Book ratio (MSCI India index to MSCI World index)

Earnings Growth - Ignoring India Is A Costly Error of Omission

Domestic institutional & retail flows remain supportive, amid rapid financialization of household savings in India

Mutual fund positioning in India remains conservative:

India's allocation in active mutual funds globally is near a 2-decade low

		India allocation		
Equity Mutual Funds	Total Assets (US\$ bn)	Avg. Fund allocation (%)	Benchmark (MSCI)	OW/UW (bp) vs. MSCI
Global ex-USA funds	415	0.9%	3.9%	-295 bp
EM Funds	205	9.5%	11.9%	-240 bp
Global funds	615	0.2%	1.4%	-115 bp
AEJ Regional funds	90	10.0%	13.5%	-345 bp
Overall (AUM wgt.)	\$1,325 bn	2.5%	4.6%	-210 bp

Note: As of Apr-end, 2026

Risks/challenges

- Geo-politics/recession led growth slowdown & tariff wars (uncertainty)
- Oil prices – above USD 100/bbl will impact, inflation, currency, CAD and BOP
- Consumption demand continues to be tepid
- Implications of Gen AI on different sectors/industry – medium term risk

Upcoming new Investment Projects

Company	Details
Apple	Apple has laid out plans to move to Indian assembly of the majority of iPhones it sells in the US by the end of 2026, with an aim to completely shift the production of over 60 million iPhones annually
Samsung	Samsung is considering shifting some of its smartphone and electronics manufacturing to India.
HP	Dixon Technologies is investing over ₹1,000 crore in a new facility in Tamil Nadu, where it will manufacture laptops for HP. Scheduled to begin operations in May, the unit will have an initial production capacity of two million laptops annually.
Asus	Taiwanese brand Asus recently launched an assembly line in collaboration with VVDN Technologies at Manesar, following months of discussions focused on scaling operations and increasing localisation.
Alphabet	Alphabet Inc, the parent company of Google, has also begun discussions with its contract manufacturing partners in India—Dixon Technologies and Foxconn—to move a portion of global Pixel smartphone production from Vietnam to India
Textile	Industry sources estimate that up to 15% of US-bound orders have moved from China to India in recent months, as American brands seek suppliers who can meet tight delivery schedules and offer tariff advantages.
BYD	BYD, the world's largest electric vehicle (EV) maker, is set to build its first manufacturing plant in India, marking a pivotal move in its global expansion.
Vinfast	Vietnamese electric vehicle maker VinFast (VFS.O), opens new tab plans to open a car assembly plant in India by the end of June. Last year, VinFast and the southern Indian state of Tamil Nadu agreed to work towards an investment of up to \$2 billion, with an intended commitment of \$500 million for the first five years of the project, with the plant expected to have an annual production capacity of up to 150,000 vehicles.

This presentation is strictly private and confidential and is being issued to a limited number of investors:

- (a) who fall within with the exceptions set out in SCA Resolutions No. 3 R.M. of 2017 (Qualified Investors, excluding natural persons) and have confirmed the same;
- (b) upon their request and confirmation that they understand that the international shares have not been approved or licensed by or registered with the SCA, or any other relevant licensing authorities or governmental agencies in the UAE; and
- (c) must not be provided to any person other than the original recipient, and may not be reproduced or used for any other purpose.

Disclaimer for Chile

This private offering of securities is addressed only to ‘Qualified Investors’ (as defined in CMF General Rule No. 216).

Neither the DSP Global Funds ICAV [Issuer] nor the DSP India Equity Fund [Security] will be registered in the Registro de Valores Extranjeros (Foreign Securities Registry) kept by the Chilean Commission for the Financial Market (Comisión para el Mercado Financiero or “CMF”) and will not be subject to the supervision of the CMF. If such securities are offered within Chile, they will be offered and sold only pursuant to General Rule 336 of the CMF, an exemption to the registration requirements, or in circumstances which do not constitute a public offer of securities in Chile within the meaning of article 4 of the Chilean Law No. 18,045 on Securities Market. The commencement date of this offering is the one contained in the cover pages of this [offering memorandum/prospectus]. The issuer has no obligation to deliver public information in Chile. These Security shall not be subject to public offering in Chile unless registered in the Foreign Securities Registry.

La presente oferta de valores está dirigida a Inversionistas Calificados (según se define en la Norma de Carácter General N° 216 de la CMF).

El DSP Global Funds ICAV [EMISOR] y los DSP India Equity Fund [VALORES] no serán registrados en el Registro de Valores Extranjeros de la Comisión para el Mercado Financiero o “CMF” y no están sujetos a la fiscalización de la CMF. Si dichos valores son ofrecidos dentro de Chile, serán ofrecidos y colocados sólo de acuerdo a lo establecido en la Norma de Carácter General 336 de la CMF (una excepción a la obligación de inscripción en el Registro de Valores Extranjeros), o en circunstancias que no constituyan una oferta pública de valores en Chile según lo definido por el Artículo 4 de la Ley 18.045 de Mercado de Valores de Chile. La fecha de inicio de la presente oferta es la indicada en la portada de este [offering memorandum/prospectus]. El [EMISOR] no está obligado a entregar información pública en Chile, incluyendo en relación a los [VALORES]. Los VALORES no podrán ser objeto de oferta pública mientras no sean inscritos en el Registro de Valores Extranjeros de la CMF.

Disclaimer for Hong Kong

FOR RESIDENTS OF HONG KONG

WARNING: The contents of this document have not been reviewed by any regulatory authority in Hong Kong. You are advised to exercise caution in relation to the offer. If you are in any doubt about any of the contents of this document, you should obtain independent professional advice.

This document does not constitute an offer or invitation to the public in Hong Kong to acquire Shares. Accordingly, no person may issue or have in its possession for the purposes of issue, this document, the ICAV's Prospectus or any advertisement, invitation or document relating to the Shares, which is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong except where: (i) the Shares are only intended to be offered to "professional investors" (as such term is defined in the Securities and Futures Ordinance of Hong Kong (Cap. 571 of the Laws of Hong Kong), as amended (the "SFO") and the subsidiary legislation made thereunder); (ii) in circumstances which do not result in this document or the ICAV's Prospectus being a "prospectus" as defined in the Companies (Winding Up and Miscellaneous Provisions) Ordinance of Hong Kong (Cap. 32 of the Laws of Hong Kong), as amended (the "CO"); or (iii) in circumstances which do not constitute an offer or an invitation to the public for the purposes of the SFO or the CO. The offer of the Shares is personal to the person to whom this document has been delivered and a subscription for Shares will only be accepted from such person. No person to whom a copy of this document is issued may copy, issue or distribute this document in Hong Kong, or make or give a copy of this document to any other person.

Disclaimer for Singapore

FOR RESIDENTS OF SINGAPORE

For Professional Investors Only

This presentation is intended solely for Institutional Investors, as defined under Section 4A of the Securities and Futures Act 2001 ("SFA"). It is not directed at, and may not be distributed to, any person in Singapore who is not an Institutional Investor. Any offer, sale, or invitation for subscription of Shares in Singapore may only be made pursuant to an exemption under the SFA, including the exemption for offers made to Institutional Investors under Section 304 of the SFA. Such offers may not be circulated or distributed to persons in Singapore other than those permitted under the relevant SFA provisions.

This presentation is provided for information purposes only, on a private circulation basis, and does not constitute investment advice, a recommendation, an offer, or a solicitation to buy or sell any securities or enter into any transaction. You should not rely solely on the information herein and should consult your own advisers on legal, tax, financial, and other considerations relevant to an investment decision.

Disclaimer for Germany

For Professional Investors in Germany Only

This presentation is a marketing communication intended solely for professional investors in the Federal Republic of Germany. It does not constitute investment advice, legal or tax advice, or an offer to buy or sell any financial instrument. All product information is provided to ensure it is fair, clear, and not misleading, and reflects the product's characteristics as required under applicable BaFin marketing rules. Forward-looking statements are not guaranteed and involve risks, including the potential loss of capital. Distribution of interests in investment funds in Germany is subject to BaFin's marketing notification requirements. Investors should consult the official prospectus and Key Information Document (KID) for complete details, available free of charge upon request. This material must not be shared with individuals who do not qualify as professional investors under German law.

DSP International Deutschland GmbH is registered as a tied agent with BaFin (ID No. 80180703) and, within the scope of investment brokerage of financial instruments pursuant to Section 2 (2) Nos. 3 WpIG, acts exclusively for the account and under the liability of AHP Capital Management GmbH, Weissfrauenstraße 12–16, 60311 Frankfurt am Main, Germany (Section 3 (2) WpIG)

Disclaimer for South Korea

FOR RESIDENTS OF SOUTH KOREA

For Professional Investors Only

This presentation has been prepared exclusively for Institutional Investors in the Republic of Korea and is provided for informational purposes only. It does not constitute an offer, solicitation, marketing activity, or recommendation to purchase or sell any financial investment product as defined under the Financial Investment Services and Capital Markets Act of Korea (FSCMA). The content is intended solely to provide general investment strategy information and does not take into account the specific investment objectives, financial situation, or needs of any particular investor.

This material has been prepared based on sources believed to be reliable; however, no representation or warranty, express or implied, is made regarding the accuracy, completeness, or adequacy of the information contained herein. Past performance is not indicative of future results, and any forward-looking statements are subject to risks and uncertainties that may cause actual outcomes to differ materially.

Distribution of this material is strictly limited to institutional investors who are permitted to receive such information under Korean law. It may not be reproduced, redistributed, or used for any other purpose without prior written consent. Recipients are responsible for ensuring that their review and use of this material comply with all applicable laws and regulations of Korea.

Nothing in this presentation should be construed as legal, tax, accounting, or investment advice. Investors should consult their own professional advisers before making any investment decisions.

Disclaimer for Japan

FOR RESIDENTS OF JAPAN

Important Notice This presentation has been prepared solely for the purpose of providing general information regarding the investment philosophy, research process, and strategy approach of the manager. It does not constitute, and should not be construed as, an offer, solicitation, recommendation, or invitation to subscribe for, purchase, or sell any securities, financial instruments, or interests in any fund in Japan or to Japanese residents.

Nothing in this material is intended to induce the acquisition of any specific securities or to form the basis of any investment decision. The content is general, educational, and conceptual in nature, and does not describe the terms of any product, does not provide performance information, and does not include any offering documents.

This information is provided solely to institutional investors for discussion purposes. It should not be relied upon as legal, tax, accounting, or investment advice. Any forward-looking statements, projections, or outlooks are for illustrative purposes only and do not guarantee future results.

The manager does not conduct investment management business or solicitation activity in Japan unless expressly permitted under applicable exemptions and notifications. No action has been taken to register or file any securities or fund interests under the Financial Instruments and Exchange Act of Japan or any other Japanese laws or regulations.

In this material DSP Asset Managers Pvt. . (the AMC) has used information that is publicly available, including information developed in-house. Information gathered and used in this material is believed to be from reliable sources. The AMC however does not warrant the accuracy, reasonableness and / or completeness of any information. The above data/ statistics are given only for illustration purpose. The recipient(s) before acting on any information herein should make his/ their own investigation and seek appropriate professional advice. This is a generic update; it shall not constitute any offer to sell or solicitation of an offer to buy units of any of the Schemes of the DSP Mutual Fund. The data/ statistics are given to explain general market trends in the securities market and should not be construed as any research report/ recommendation. We have included statements/ opinions/ recommendations in this document which contain words or phrases such as “will”, “expect”, “should”, “believe” and similar expressions or variations of such expressions that are “forward looking statements”. Actual results may differ materially from those suggested by the forward looking statements due to risks or uncertainties associated with our expectations with respect to, but not limited to, exposure to market risks, general economic and political conditions in India and other countries globally, which have an impact on our services and/ or investments, the monetary and interest policies of India, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices etc. Mutual Fund investments are subject to market risks, read all scheme related documents carefully.
