Our Principles Drive Investor Focus and Alignment

01.

Maintain Long-Term Mindset

Generating long-term alpha (~200-700 bps) across strategies since inception.

02.

Focus on Investors First

Close funds when margin of safety is low / valuations are sky high.

03.

Hold Investment Frameworks Sacred

Operate with transparency and clarity to build trust and alignment with investors.

04.

Pay Attention to Sustainability

Gradual introduction of ESG frameworks into our portfolios; signatory to UNPRI.

05.

Minimize Risk

Employ the 10th man rule ('Sceptical Analyst') to minimize accidents due to accounting frauds or poor governance.

06.

Inculcate Owner's Mindset

Offer a long-term employee stock ownership plan

07.

Keep Skin in the Game

The DSP Group family invests their wealth in DSP Funds, as do DSP employees.

MSCI India Small Cap Index

There is a significant investable market beyond the large and mid caps

Mid caps have outperformed over long term

ROLLING RETURNS

RETURNS/RISK (ROLLING BASIS)

Our actively managed small and midcap oriented strategy has generated superior return/risk

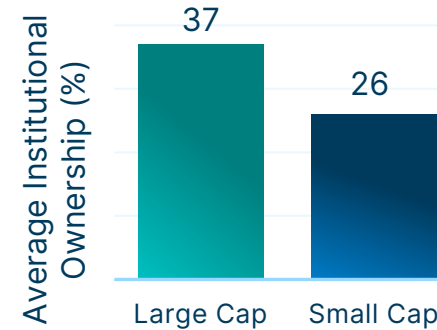

Low ownership, sparse research, and high diversification contribute to alpha

1 Large & mid cap alpha warning: Small caps present alpha opportunity

~ 4.3%

Alpha CAGR since inception of the DSP Strategy over the MSCI India Index

2 Small cap stocks tend to be under-owned and under-researched

3 MSCI India Small Cap is more diversified, offering variety in stock picks

High ROE and earnings growth companies generate wealth

- We analysed data from Indian large cap, mid cap and small cap companies over the past decade to understand their return potential
- In the Indian markets, a combination of healthy ROE and high earnings growth has historically resulted in superior price performance

Elimination is key

A sizeable pool of high-quality companies have the potential to provide superior returns

India has delivered the highest proportion of multi baggers among 10 major markets globally

Within a 5-yr rolling period since 2000, 54% of NSE 500 equities have produced >10x returns.

Common Traits of Multi Baggers in India

Growth

25% median sales CAGR & ~37% median profit CAGR

Capital allocation

>15% ROE and Cash ROIC for most, with 75% showing rising ROEs

Inexpensive starting valuations

~70% trading at <1x LTM P/B ratio or <10x NTM P/E ratio

High promoter holding

Majority promoter ownership (58%) & lesser institutional investment (23%) initially

Small/mid-cap bias

~50% with initial market cap of <US \$50M

Investment Philosophy

Portfolio Manager: Vinit Sambre

Vinit Sambre,
who has been at DSP since 2005,
heads the equity team

“Patience, embracing volatility
and owning capital efficient
businesses run by capable
managers for long periods of time
is my source of wealth creation.”

Experience

- 24 years of investment experience across 4 major market cycles
- In-depth knowledge of Indian equities, specifically in the small and mid-cap space
- Successfully delivered on a variety of mandates, including concentrated thematic portfolios

Style

- Buy & hold
- Identify and back high-quality managements / promoters through cycles

Recognition

- Recipient of several awards during his tenure

How we generate investment ideas

Many sources of ideas:

- Interactions with 550+ companies a year (including companies outside our coverage)
- 15+ conferences a year
- Industry experts, supply chain checks
- Sell-side interactions
- Journals, magazines, and other sources

- Daily morning calls
- All-day team meetings every Wednesday
- Internal screens

Investment philosophy is focused on sustainable long-term wealth creation

01. Our fundamental bottom-up analysis prefers companies exhibiting:
 - Scalability of business
 - Identifiable and sustainable moats
 - Consistent high Return on Equity over the cost of capital
 - Incremental capital allocation in equivalent or better ROE businesses
 - Prefer companies with good governance
02. We have a long-term investment horizon; however, we optimise weights considering business and valuation cycles.
03. We would sell our positions where valuations rise to unjustifiable levels, or where the investment thesis breaks down.

We are wary of:

- Capital misallocation
- Poor governance
- Business Disruption like:
 - Regulatory changes
 - Technological disruptions

Investment Framework – Pillars of Stock Selection

Metrics to evaluate the 3 pillars of stock selection

Metrics

- Simple & predictable
- Scalable businesses
- Competitive advantage (Moats)
- Positive cash flows & high ROE

- Credible & capable
- Passionate promoters
- Past track record
- Prudent capital allocation

- Decision based on stage of business cycle and valuation cycle.
- Avoid companies at top of business cycle and valuation cycle.

Live Examples

Supreme Industries: Diversified plastic manufacturer with a scale advantage, large geographical distribution and high ROEs.

Coforge, run by a passionate CEO & outgrown the midcap IT pack over the last few years, with the following characteristics:

- Profit Growth – ~20%
- Price Appreciation – ~21.2%
- Average ROE – ~23.6%

Off late we have trimmed the industrial exposure due to peak multiple & peak business cycle.

Quantitative framework to build long term conviction and avoid big errors

- 3 Yr. Avg. ROE >16%
- 5 Yr. Avg. EBITDA Growth >13%
- 5 Yr. Avg. PAT Growth >13%
- Margin Increase: EBITDA Growth > Sales Growth
- Earnings per Share (EPS) Growth Variation <100%
- Net Debt/EBITDA <3x
- Positive Free Cash Flow Yield
- Receivables, Inventory & Payable Days Variation <30 days

Quantifying metrics to evaluate the 3 pillars

Our learnings over time

01.

Deep analysis of historical business cycles over 10-15 years, not merely management's future guidance.

02.

Bottom up company research is more useful than predicting macro.

03.

Temperament – ignore noise and don't react to every piece of news.

04.

Contra-cyclical plays – use temporary disruption/down cycles to buy good companies.

05.

With significant dispersion within each sector, active stock picking is important and eliminating losers is key.

06.

Remember learnings from past mistakes

07.

It's essential to work with a long-term mindset and have investors with a long-term capital horizon (>5 years).

Patience

- Simple scalable business
- Large opportunity
- Strong cash flow, ROCE
- Avoiding noise and not processing each & every piece of information

Patience – Temporary disruption is an opportunity

- Use temporary disruption to double down
- Not easy when the stock goes through correction
- Our confidence stems from deep understanding of business cycle, fundamentals and management attributes
- Low impact cost during such periods

How we size our portfolio

Sizing is driven by conviction, upside and sense of business cycle and valuation cycle.

Our portfolio comprises:

4-5%

High conviction, low to medium business cycle, reasonable valuation, long term businesses

2-4%

High conviction, low to medium business cycle, high valuation businesses

1-2%

High conviction, medium to high business cycle, high valuation businesses (that we gradually build on during temporary distress)

Buy and hold approach → lower portfolio turnover & alignment with guidance to investors

Category median portfolio turnover ratio

47%

DSP strategy portfolio turnover ratio

30%

The stock market rewards those who patiently invest in capital efficient businesses for the long term

*Median for last 3 years

Our Buy & Hold Philosophy

- We align holding periods of investee companies with their entire business cycles.
- We size companies in our portfolio based on our assessment of how they rank on our philosophy.

Top 5 gainers (Last ~5 years)	Return Multiplier	Top 5 Gainers*	Return Multiplier	Holding Period (years)	Period Held

Case Study 3: Phoenix Mills

1

Idea generation

- a. Phoenix provides relevant real estate space for brands with much higher footfalls. Most of the malls are at prominent destination in key cities
- b. Higher real estate cost & availability of large size land parcel within the city makes it a higher entry barrier business
- c. Per capita grade A malls are significantly lower in India, which provides very high growth visibility in coming years
- d. With rising urban population, rising income levels & aspirations, demand for quality real estate for retail will remain high
- e. Strong unit economics

2

In depth company analysis

Case Study 4: Supreme Industries

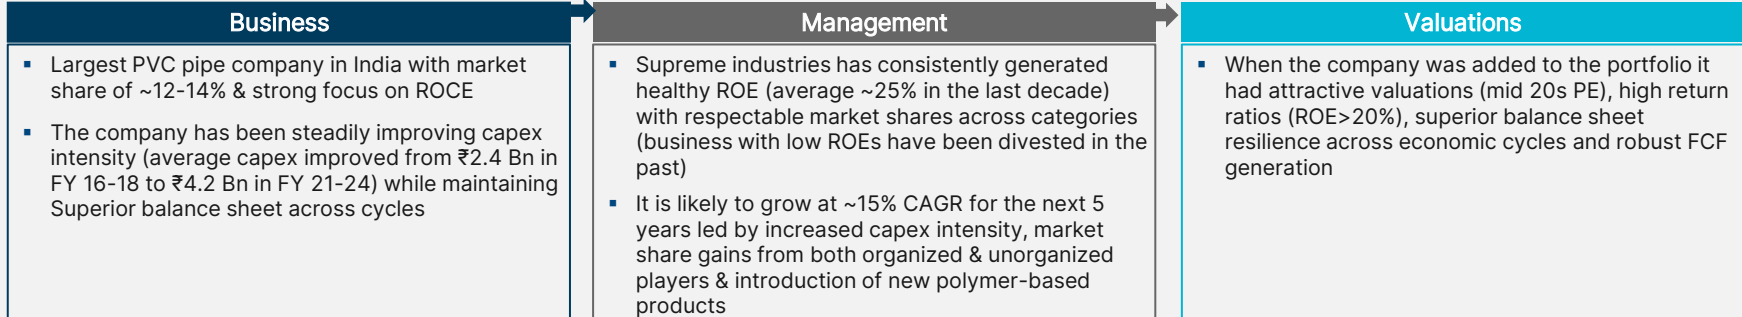

1

Idea generation

- a. Per-capita PVC pipe consumption significantly lower than even world average (11kg vs 30 kg), this demand is set to increase led by high Infra spends, Nal se Jal yojna & sustained demand in housing
- b. PVC pipe industry is very consolidated with the top 5 players contributing ~40% of market share reflected in the strong pricing power
- c. Growth prospects of Pipe industry to be high due to improving completion rate of real estate projects and revival in demand for agri-pipes

Addressing valuation

- Valuations are not cheap and looks to be pricing in FY27 as well.
- We are solving in two ways
 - Investing in capital efficient businesses across sectors run by capable management thereby reducing big risk of capital loss.
 - Identifying businesses with longevity of growth and strong moats.
 - 1.5 year of market consolidation or 20-25% lower price points could make it attractive – **wait or invest ?**
- My view to Investors
 - Growth potential looks promising over next 5-7 years with higher probability of mid sized companies outperforming on earnings growth matrix.
 - We have put in strong process to identify long term wealth creators and avoid big risk arising due to poor governance or narrative driven businesses.
 - Invest with 3-5 years time horizon rather than 1 year time horizon.

I own businesses with superior moats and earn over ~16% ROEs

No. of Companies	Particulars	Total Weights (%)	P/E - FY27E	P/BV - FY27E	ROE-FY27E	Growth-FY27E
16	Less than 20x P/E	23%	13.9	1.9	14.7%	23.3%
16	Between 20x and 30x P/E	29%	25.6	4.1	18.1%	23.6%
30	Above 30x P/E	44%	52.7	8.5	20.9%	27.3%

- Significant portion of the most expensive buckets consist of consumer discretionary names that are in low to mid cycle. For example, Page Industries, Hatsun Agro, Phoenix Mills, Supreme Industries, Bharat Forge.
- Stocks in the least expensive buckets have decent ROEs, not compromising on quality.
- Page Industries – Near term growth lower than what was achieved in last 10 years means low cycle.

Growth Metrics	1 Yr	5 Yr	10 Yr
Revenue	-2.8%	9.9%	14.5%
EBITDA	1.1%	7.2%	13.1%
Profit	-0.4%	7.6%	14.0%
Price	22.2%	19.7%	11.1%
Average ROE	35.6%	41.4%	43.1%
Average ROCE	50.2%	56.0%	58.0%

Quality is mean reverting ! Our portfolios are aligned to this shift

- For creating long term wealth both Quality and valuations are important. Just valuations in isolation may or may not work.
- Quality has suffered in the past 3-4 years where our portfolios also underperformed.
- Gradual mean reversion taking place, that augurs well for our portfolio.

ESG Investment Process

ESG Integration Framework:

- We have developed a proprietary risk-opportunity structure with 45 scored criteria and 60 analytical data points covering a wide range of material ESG topics.
- We collate and analyze data on stakeholders' environmental/social concerns, GHG emissions profile, long & short-term climate targets, biodiversity, water & wastewater, energy, circular economy, human rights, diversity, human capital management, data privacy, product quality, safety, supplier engagement, access and affordability, etc.
- We research governance related topics such as related party transactions, board & key management personnel (KMP) remuneration, board independence, promoters pledging, audit quality, controversies and credit rating parameters, to name a few.

ESG Investment Process

Engagement

Our engagement motivations are two-fold: to mitigate risk and generate positive impact.

The engagement process also involves the firm stewardship committee and active voting on company resolutions with help from a proxy voting firm

Our Sceptical/Forensic Analysis Framework

The Aim of Forensic Analysis

The value of avoiding an accident is almost always underappreciated until one occurs. Having a specialist in the team helps us avoid most accidents by increasing our rigor on forensic research.

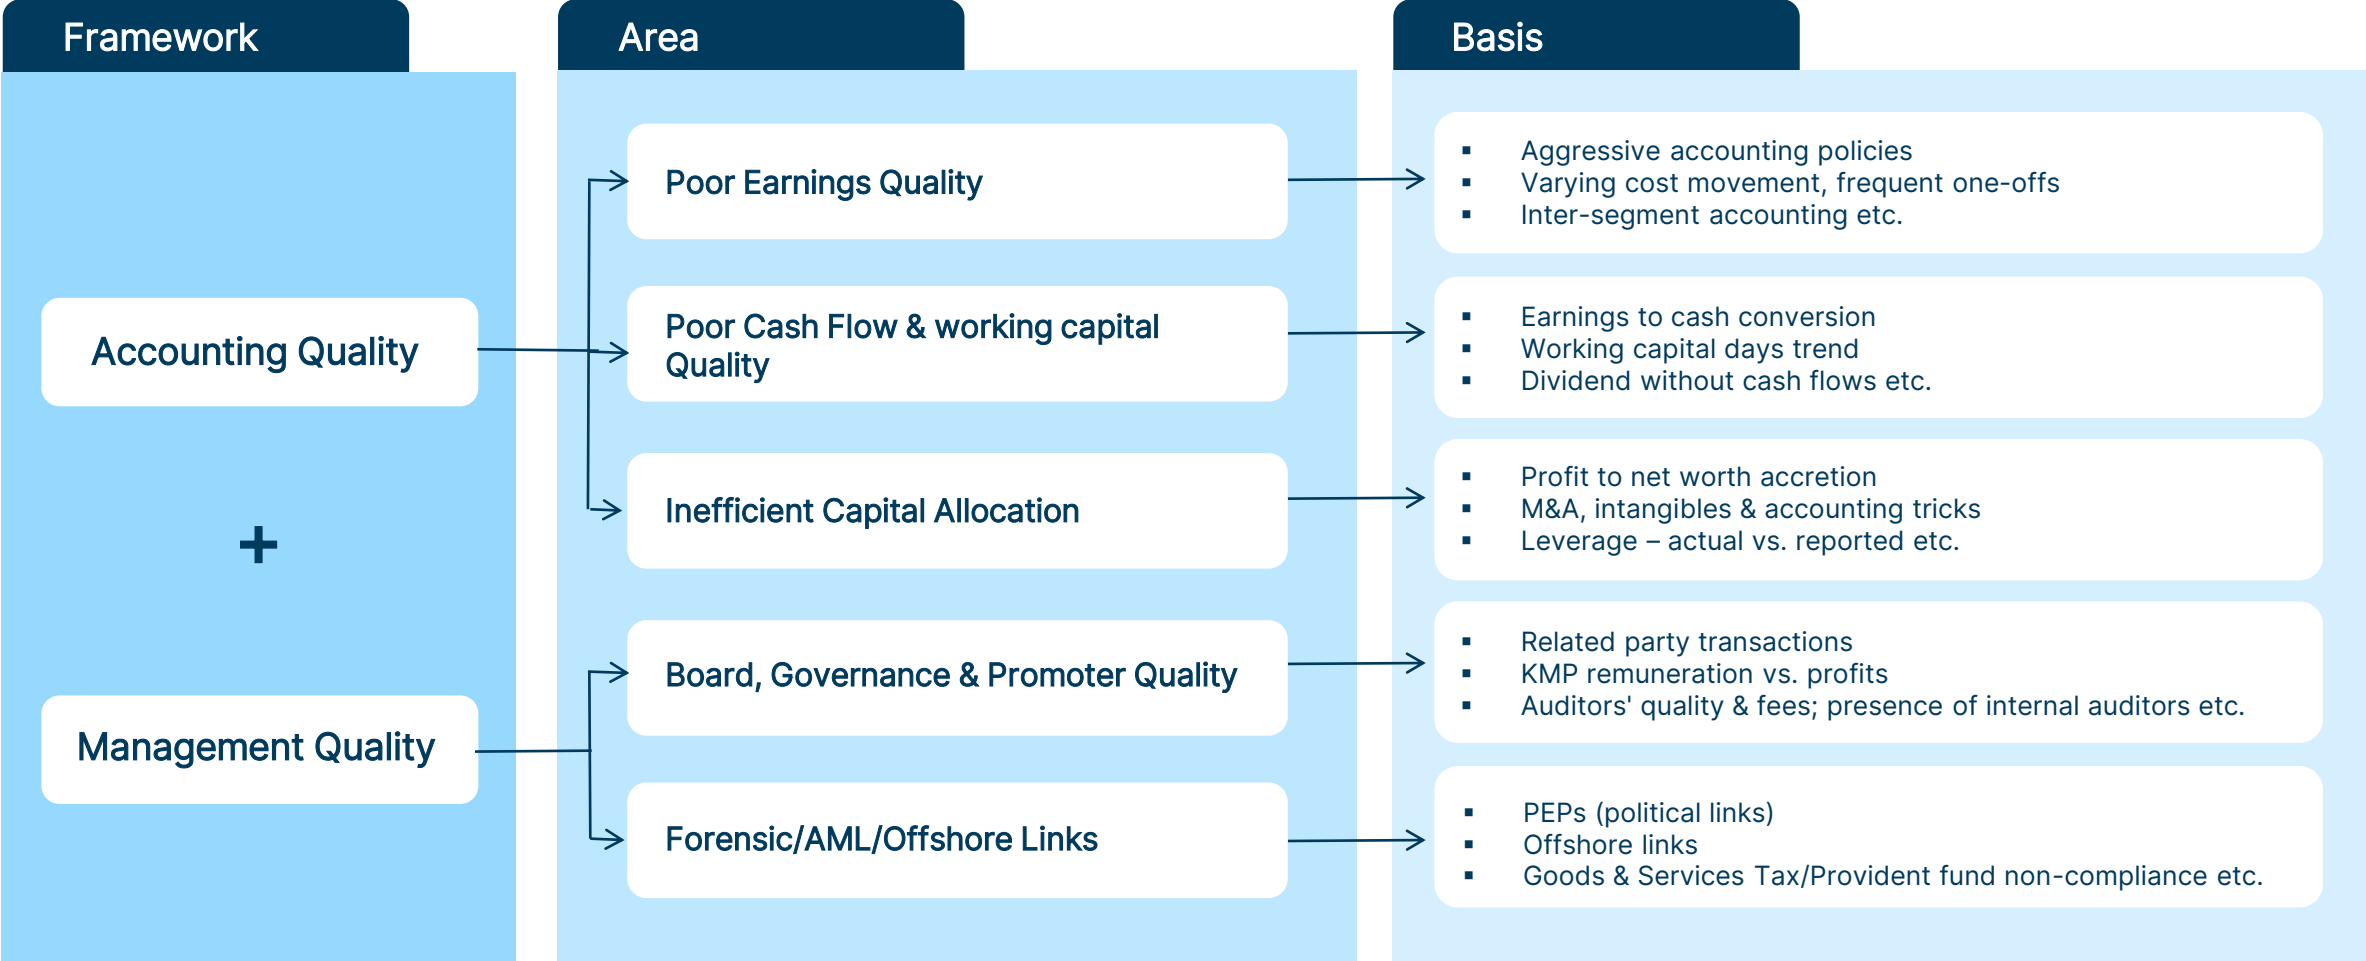

We aim to identify and avoid companies with these characteristics:

- Poor earnings quality, aggressive accounting and consistent overstatement of earnings
- Manipulated/unusual cash flows that mask the real picture
- Bad capital allocation and high balance sheet (BS) risk
- Poor board, governance and promoter background/quality

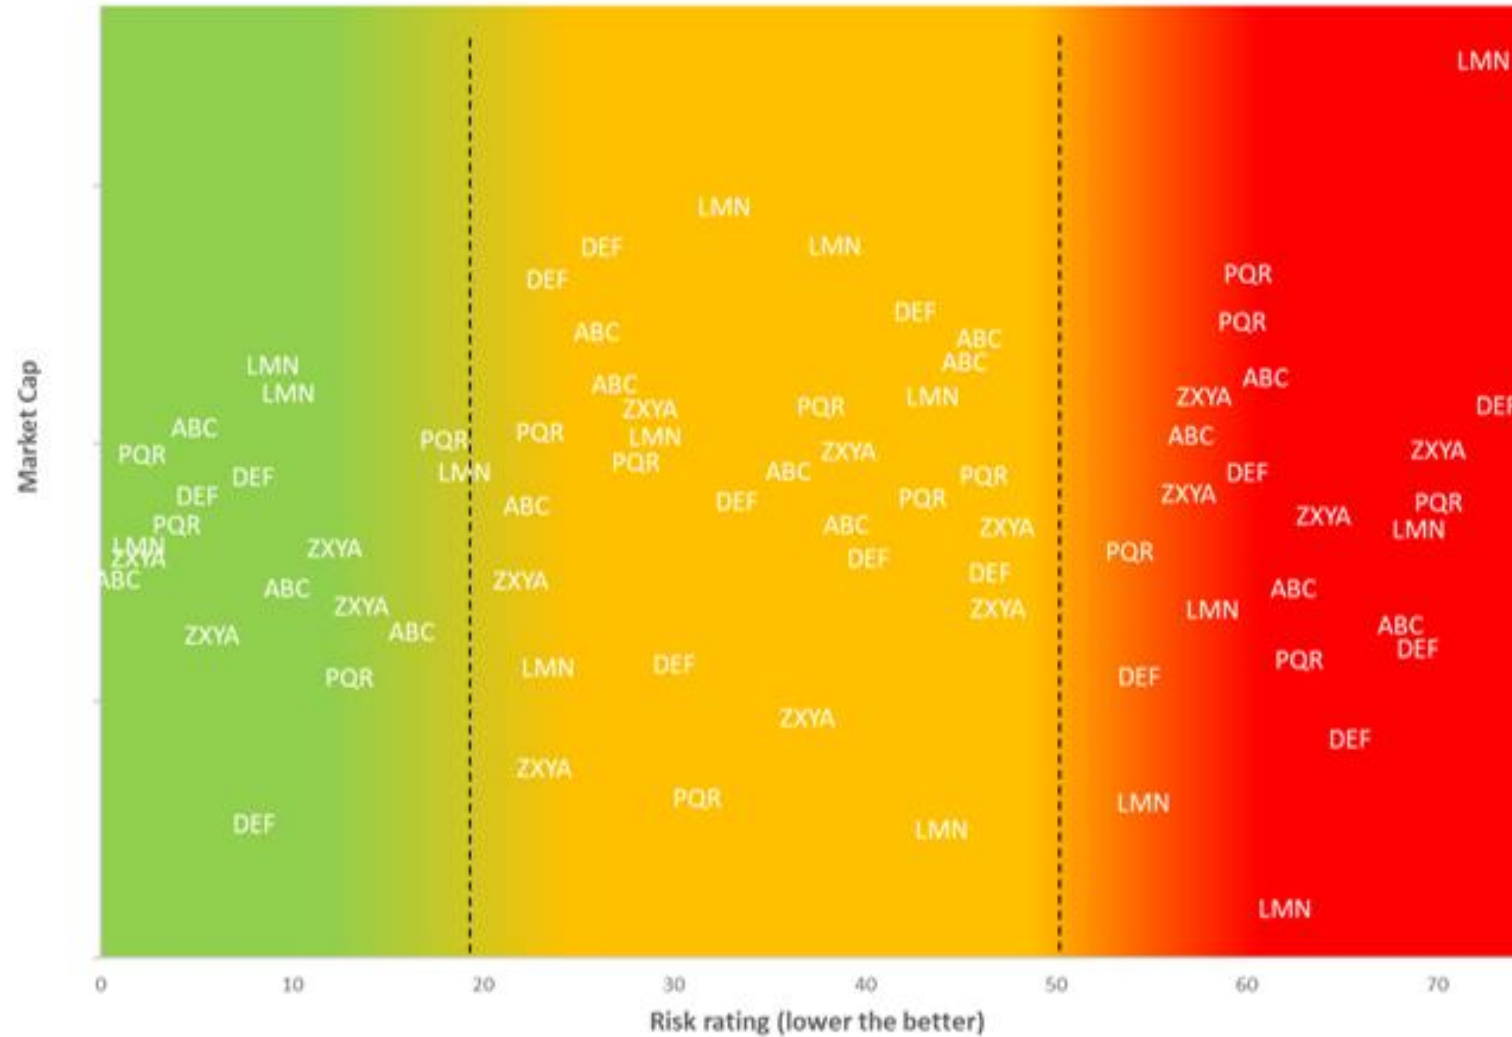

We manage risks by rigorous forensic research on investee companies

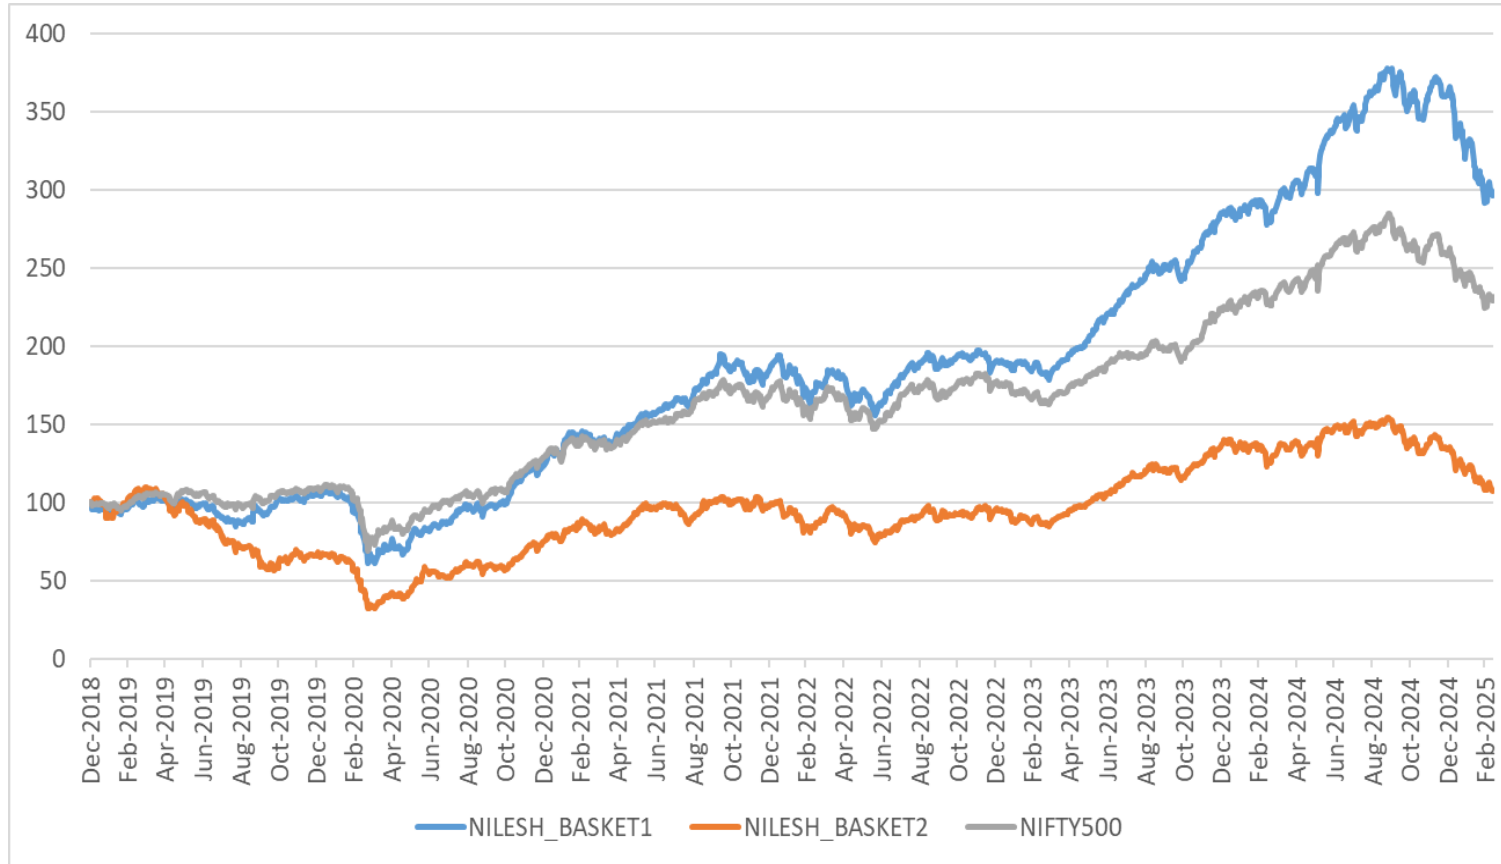

Forensic Framework Checklist

Bottom line

- *Companies with poor earnings quality/ poor governance underperform in long run.*
- Though, irrationality can persist in short term led by narratives, strong business cycle/ momentum, favourable macro environment, etc etc....

Investment Risk Management at DSP

Portfolio Risk Monitoring

- Independent Risk & Quantitative Analysis team (RQA)
- Regular Risk meetings to “Hold a Mirror” to portfolio risk
 - Macro stress testing
 - Sector & style exposure & returns monitoring, market trends
 - Tolerance limits for stop losses and drawdown

Fund Terms and Structure

Fund Terms

Objective*: The DSP India Equity Fund (the “Fund”) aims to achieve long term capital appreciation from a portfolio that is substantially constituted of equity and equity related securities of mid cap and small cap companies.

Investment philosophy : Bottom-up approach to stock picking.

Universe: It is anticipated that the Fund will invest across the entire range of capitalizations (across large cap, mid cap and small cap), however there will be a focus on mid cap and small cap companies. The Fund is actively managed in reference to Nifty Midcap 150 Index, by virtue of the fact that it uses the Index for performance comparison purposes. However, the Index is not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the Index.”

Diversified: Typically portfolio of ~50 stocks across market capitalization

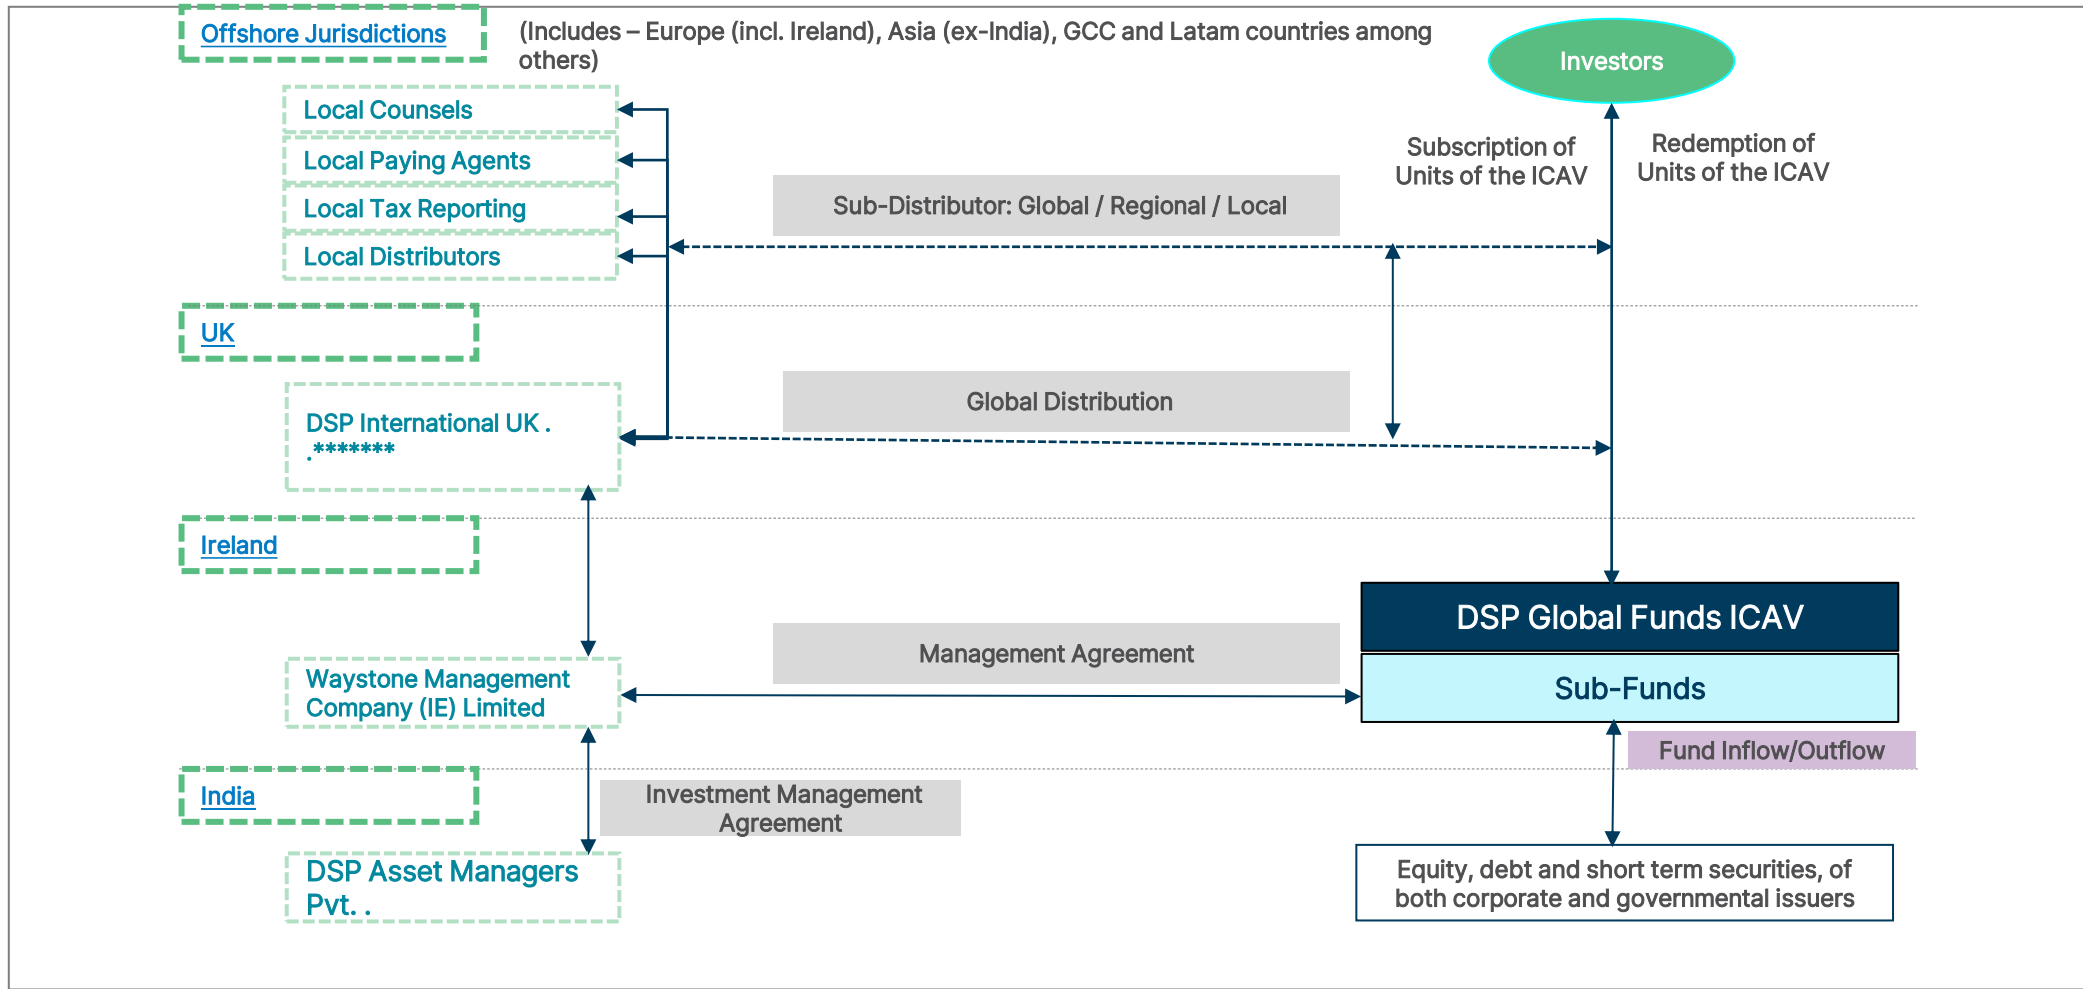

Risk management: Governed by a robust risk framework; No leverage;

Why India Outperforms Over The Long Term? It's Not Flows, GDP Growth or The Story...

- India's long-term market outperformance is often attributed to familiar narratives such as strong domestic flows or robust GDP growth.
- Adjusting for differences in the cost of capital, India stands out among global markets. It ranks second only to the USA in the number of companies that have maintained an ROE above 20% for more than a decade.
- This sustained strength in corporate profitability is the true engine of India's market outperformance underscoring the enduring fundamentals, rather than popular macro narratives, are what ultimately drive long-term equity returns.

ROE adjusted for Cost of Equity – India does better than most peers

Why Now?

Is sustained 9 - 10% nominal GDP growth for a large economy even possible?

- China/South Korea grew per capita GDP at 8.0% / 8.8%, respectively, for 10 years from levels similar to India's US\$7,207 PPP adjusted 2018 per capita GDP.
- To convert to nominal GDP growth, we factor 1.5% population growth (assumed).
- So 9 to 10% nominal GDP growth is certainly possible, over a 10 year period or longer.

4 key themes which we believe will play out for India going forward

- 1 Penetration of Financial Services
- 2 Consumption story fast forwarded by Digitization
- 3 Infrastructure boom
- 4 Export Opportunities

Are you late in investing into India? **No, not in our view.**

- Equity returns have matched strong economic performance over past two decades
- Focus on earnings, not just starting P/E - Starting valuations in CY 2023 was like today but markets up ~20%.
- India is likely to see the highest GDP growth in the next 2 years, vs. key global markets
- Capex + Real Estate cycle to drive earnings and upgrades
- Corporates have deleveraged (net debt to equity at 0.5x)
- Corporate profits to GDP ratio improving in recent years
- Foreign flows & positioning remain conservative, suggesting room to increase exposure in medium term
- Domestic flows remain supportive (financialization of household savings in India)

Earnings, Valuations and Flows

India Valuations:

Relative – Price to Book ratio (MSCI India index to MSCI World index)

Earnings Growth - Ignoring India Is A Costly Error of Omission

Domestic institutional & retail flows remain supportive, amid rapid financialization of household savings in India

Cumulative fund flows in Indian equities (US\$ bn)

Monthly flows in domestic MFs through Systematic Investment Plans (SIP)

Mutual fund positioning in India remains conservative:

India's allocation in active mutual funds globally is near a 2-decade low

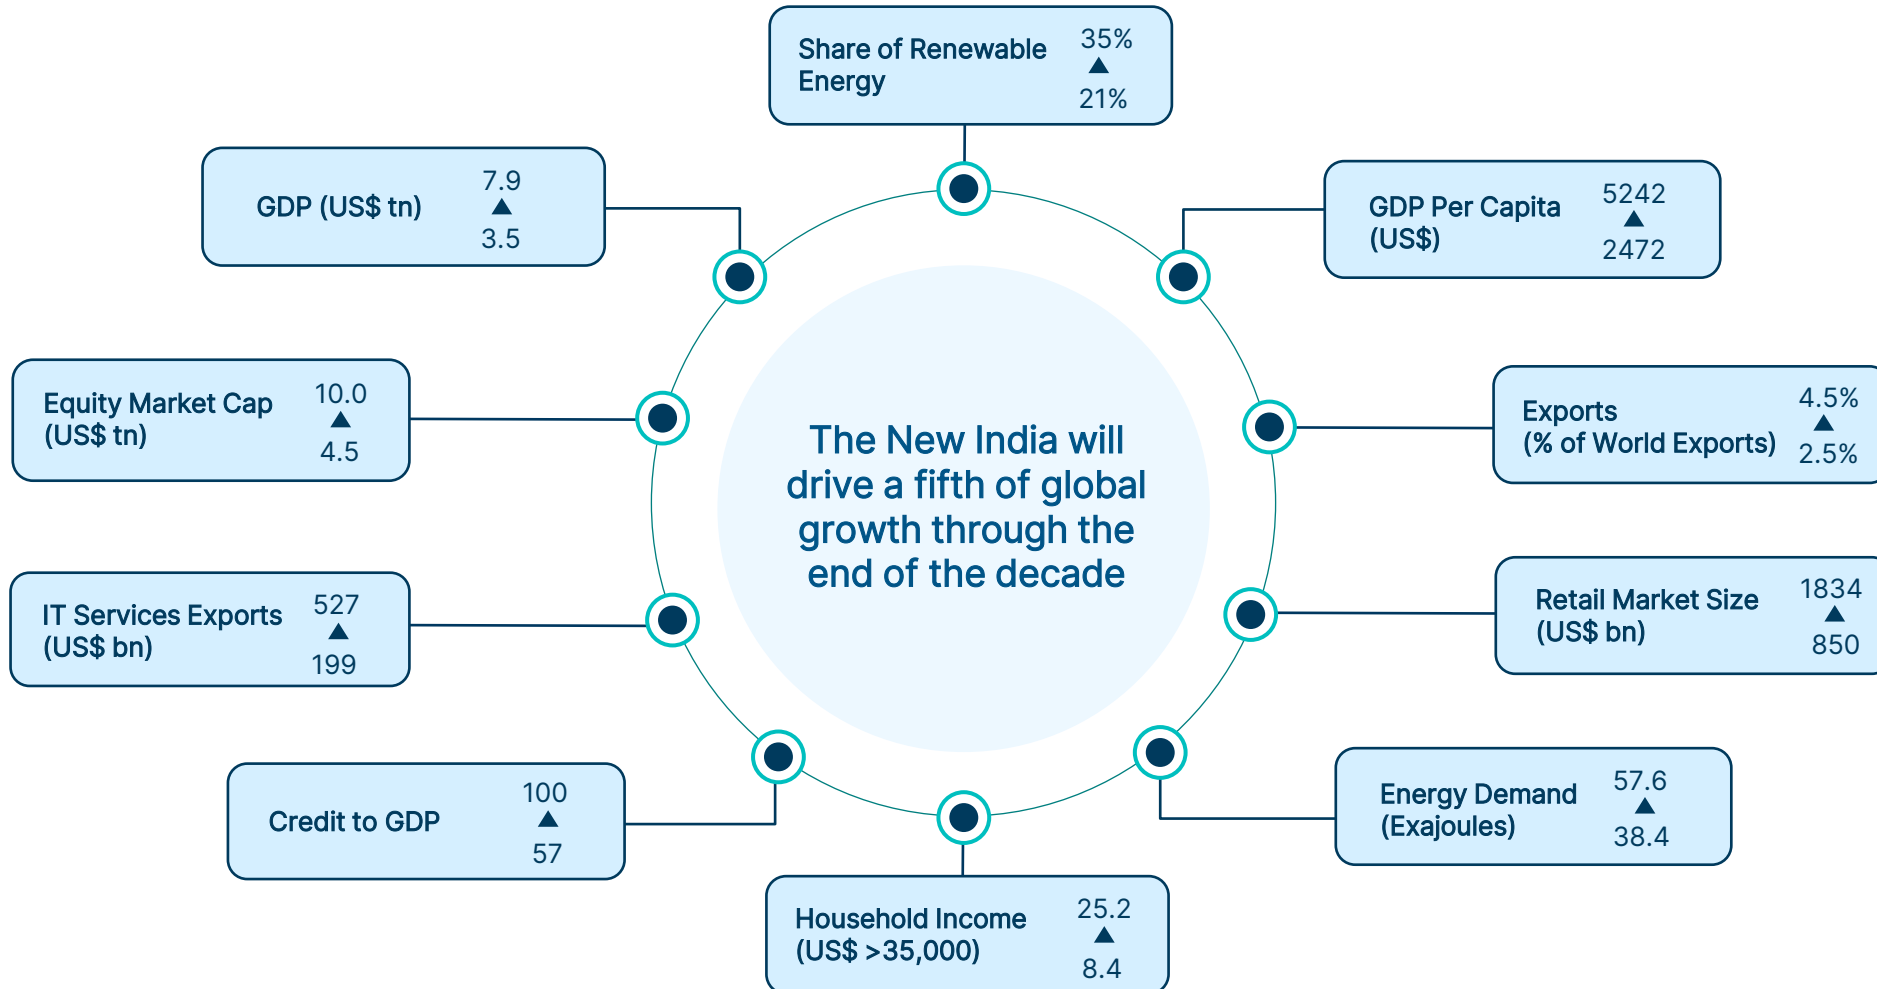

Risks/challenges

- Geo-politics/recession led growth slowdown & tariff wars (uncertainty)
- Oil prices – above USD 100/bbl will impact, inflation, currency, CAD and BOP
- Consumption demand continues to be tepid
- Implications of Gen AI on different sectors/industry – medium term risk

India @ 2030: Unleashing Potential, Driving Transformation

Appendix

Evolution of DSP – Indian Roots, Global Partnerships

Founded in 1860, the DSP Group, headed by Mr. Hemendra Kothari, is one of India's oldest financial services firms

1860

The DSP family commenced its stockbroking business.

1875

The first Indian stock exchange (now Bombay Stock Exchange) was established, with a member of the DSP family among the founders.

1969

Mr. Hemendra Kothari joined his family's stockbroking firm DS Purbhoodas (fourth generation from the family).

1984

DSP Financial Consultants (DSPFC) entered a business partnership with Merrill Lynch, then the largest investment bank in the U.S.

2018

In August 2018, DSP Group purchased BlackRock's 40% stake. The organization was renamed DSP Asset Managers and DSP BlackRock Mutual Fund was renamed DSP Mutual Fund.

2008

As part of BlackRock's takeover of Merrill Lynch's global asset management business in 2006, DSP Merrill Lynch Fund Managers became DSP BlackRock Investment Managers.

1997

DSP Merrill Lynch Asset Management launched its first domestic equity and first domestic debt mutual fund schemes.

1996

DSPFC set up a joint venture with Merrill Lynch, providing an equity stake of 29.41% with a provision to increase it up to 40%. This new investment banking partnership was called DSP Merrill Lynch (DSPML)

2023

Effective April 1, 2023, the asset management business was demerged from DSP Investment Managers Pvt (DSPIM) to DSP Asset Managers Pvt (DSPAM).
