

MONTHLY INVESTMENT UPDATE

India Rewind

August 2026

MSCI INDIA (JUL) +1.6% _{approx.} USD terms	SOUTH KOREA (JUL) -17.9% _{approx.} AI trade reversal	FPI EQUITY (JUL) +\$2.3bn _{approx.} After 4 months outflows	DOLLAR INFLOWS (JUL) ~\$40.8bn FCNR + ECB + bonds	INR / USD ~95.4 From low of 96.96
---	---	--	---	---

MARKET CONTEXT & FLOWS

July was defined by Middle East escalation and de-escalation – a seesaw in equities, bonds and crude. Against that volatility, India gained **+1.6% USD** (approx.) while the AI trade reversed hard: South Korea **-17.9%** (approx.), Taiwan **-5.3%** (approx.) after rising ~64% and ~46% in Q2. FPIs pulled **~\$6.2bn** from South Korea and **~\$23.3bn** from Taiwan in July alone. India received **+\$2.3bn** (approx.) in equity – its first positive month after four consecutive months of outflows totaling ~US **\$27.4bn**. This is not yet a rotation into India, but the AI-trade headwind is beginning to ease.

DOMESTIC ACTIVITY

Manufacturing PMI eased to **53.5** in July – a five-year low, but firmly in expansion. Export orders rose to a three-month high, underscoring external demand resilience even as employment growth softened. Vehicle sales, tractor sales and bank credit growth all remain supportive of the broader growth momentum. Pockets of moderation are appearing, but domestic demand has not rolled over.

EXTERNAL POSITION & RBI

INR has recovered from **96.96** to **~95.4**. RBI measures mobilised **~\$40.8bn** by end-July – comprising ~\$36.7bn FCNR(B) deposits, ~\$1.5bn ECB swaps and ~\$2.6bn overseas borrowings – with G-Sec policy changes adding a further ~\$6.8bn. Independent estimates suggest total inflows under RBI schemes could reach **\$50–60bn or more**, potentially returning India's FY27 BoP to surplus after concerns earlier this year over reserve adequacy and INR stability.

FISCAL POSITION & KEY RISKS

Fiscal resilience has held: central government revenues rose **+11.5% YoY** (approx.) in Q1 FY27, while capex rose **+24% YoY** (approx.) led by defence, railways and infrastructure. The government remains broadly on track on its fiscal-deficit targets. The principal domestic macro risk remains weather. Monsoon rainfall is running below long-term averages across several regions, with kharif sowing trailing last year. A prolonged shortfall could lift food prices and inflation expectations in second half of FY27. Beyond the near-term oil and currency cycle, trade diversification, supply-chain reallocation and improving external balances continue to reinforce India's medium-term structural case.
