## DSP India Equity Fund - Class A EUR Unhedged

ISIN: IE00BJT14J34.

DSP India Equity Fund is a sub-fund of DSP Global Funds ICAV (the "ICAV").  
The Manager of the fund is KBA Consulting Management Limited (the "Manager")

### OBJECTIVES AND INVESTMENT POLICY

**Objective:** The DSP India Equity Fund (the "Fund") aims to achieve long term capital appreciation from a portfolio that is substantially constituted of equity and equity related securities of mid cap and small cap companies.

**Policy:** The Fund invests primarily in equity and equity related securities (such as equity warrants and convertible preference shares), listed or traded on a recognised exchange in India. The Fund may also invest in such equity and equity related securities listed or traded on any recognised exchange outside India provided that the business activities of the issuers of such securities are predominantly in India and may also gain exposure to India through investment in such instruments as American depositary receipts and global depositary receipts listed on any recognised exchange outside India.

It is anticipated that the Fund will invest across the entire range of capitalisations, however, there will be a focus on mid cap and small cap companies.

For ancillary purposes only, the Fund may also invest in fixed income securities listed on recognised markets, primarily in India (including bonds, notes and/or bills, issued by governments, institutions and corporations in India with investment grade ratings) (BBB- or above by Moody's/Standard and Poor's or equivalent credit ratings).

Money market instruments (including commercial paper, treasury bills, government securities having an unexpired maturity up to one year or notice money) may also be invested in. The Fund will not invest more than 10% of its net assets in aggregate in units of eligible collective investment schemes (including money market funds).

The Fund may gain exposure to equities and equity financial indices through exchange traded futures and options, however,

no OTC derivatives will be utilised. The Fund may also use FDIs for efficient portfolio management purposes.

The Investment Manager has discretion in managing the investments of the Fund. Income arising from the Fund is reinvested.

The Fund is actively managed in reference to a composite index consisting of MSCI INDIA INDEX (20% proportion) and MSCI INDIA SMALL CAP INDEX (80% proportion) (the "Index"), by virtue of the fact that it uses the Index for performance comparison purposes. However the Index is not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the Index.

**Dealing:** Shares can be bought or sold daily (except Saturday or Sunday) on days on which banks in Ireland and Mumbai and the Bombay Stock Exchange and the National Stock Exchange of India Limited are generally open for business. Orders to buy and sell can be made by submitting a request by 9.30a.m. (Irish time) on the relevant dealing day to the administrator (HSBC Securities Services (Ireland) DAC).

**Profile of Typical Investor:** The Fund is available for investment by any type of investor. The Fund may be suitable for those investors with a medium to long term time horizon who wish to gain exposure to Indian equity markets and who recognise the risks of investing in an emerging market country and who can tolerate the level of volatility of returns typical of such an investment.

**Further information:** For full investment objectives and policy details, please refer to the section entitled "Investment Objectives and Policy" in the Fund supplement (the "Supplement").

### RISK AND REWARD PROFILE

As the share class has not launched there is insufficient fund history to provide a useful indication of the risk and reward profile for the Fund. The indicator shown above is based on data from a representative model using available data for the last five years. The risk and reward indicator is based on historical data and may not be a reliable indication for the future. The risk and reward category shown is not guaranteed to remain unchanged and may change over time.

The lowest category does not mean that a share class is risk free and your initial investment is not guaranteed. The Fund is in category 6, because it invests primarily in Indian equity securities and fund currency is USD, whereas underlying exposure will be primarily in INR.

#### Risk Factors

The value of your investment in the Fund may be affected by the following risks:

- **Market Risk:** The Fund can invest in equities which may be affected by market risk (the risk of an investment losing its

value due to changes in economic conditions).

- **Investment in India:** The Fund will invest primarily in India. India is an emerging economy and investment carries with it often substantial risks.
- **Derivative and Counterparty Risk:** The Fund will enter into various financial contracts (derivatives) with other parties. There is a risk that the other party to a derivative will become insolvent or fail to make its payments which may result in the Fund and your investment suffering a loss. Investments in a derivative will not necessarily generate the same return as a direct investment in the underlying asset on which the derivative is based.
- **Liquidity Risk:** The Fund can be invested in financial instruments that may have low levels of liquidity.
- **Currency Risk:** Changes in the exchange rate between the base currency of the Fund and the designated currency of unhedged share classes of the Fund expressed in a currency other than the base currency of the Fund may lead to depreciation in the value of the shares of that share class.
- For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the Supplement and the ICAV's prospectus (the "Prospectus").
